PROFESSIONAL SUMMARY

Proactive 3rd-year B.Tech student in Artificial Intelligence & Data Science at PRMITR with practical expertise in Python, OpenCV, Pandas, and Data Analytics. Proven track record in developing real-time Computer Vision applications and building collaborative solutions in national-level hackathons like HACKRONYX 2.0. Strong grasp of algorithms, data processing, and quick adaptability to production tech stacks.

TECHNICAL SKILLS

Programming Languages:	Python (OOP, Standard Library), SQL (MySQL), C++ (Basics)
Libraries & Frameworks:	OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn (Basics)
Developer Tools:	Git, GitHub, VS Code, Jupyter Notebook, MySQL Workbench
Core Competencies:	Real-time Computer Vision, Exploratory Data Analysis (EDA), Image Processing, Problem Solving

KEY PROJECTS

Real-time Emotion & Face Detection System — github.com/balaji-ai2006/realtime-Emotion-Detection

Tech Stack: Python, OpenCV, Haar Cascades, NumPy

- Engineered an end-to-end computer vision pipeline capturing live webcam video streams for real-time facial landmark detection.
- Implemented facial expression classification algorithms to analyze and categorize emotion patterns with low processing latency.
- Optimized frame-by-frame processing loops to sustain stable 30+ FPS execution without computational bottlenecks.

AI-Powered Smart Traffic Analysis (AITraffic) — Hackathon Collaboration

Tech Stack: Python, OpenCV, Machine Learning, Data Analytics

- Collaborated in a development sprint to build an intelligent traffic monitoring prototype aimed at reducing intersection congestion.
- Processed and analyzed density video feeds to evaluate vehicle flow patterns and calculate queue dynamics in real time.
- Designed structured data pipelines to visualize congestion metrics for automated signaling recommendations.

Student Performance Analytics System — github.com/balaji-ai2006/student-analysis

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn

- Conducted thorough Exploratory Data Analysis (EDA) on student demographic and assessment datasets to discover performance drivers.
- Built visual correlation heatmaps and trend analysis charts evaluating attendance, test scores, and study consistency.

HACKATHONS & ACHIEVEMENTS

Smart India Hackathon (SIH 2026) – Internal Hackathon — Sep 2026

MoE's Innovation Cell, AICTE & PRMITR Badnera

- Participated in national-level problem-solving hackathon, ideating scalable tech solutions for public interest domains.

Participant – HACKRONYX 2.0 (National Hackathon) — Oct 2024

St. Vincent Pallotti College of Engg. & Tech., Nagpur (Powered by Unstop)

- Collaborated in a fast-paced sprint to ideate and prototype technology-driven software solutions.

EDUCATION

Bachelor of Technology (B.Tech) - Artificial Intelligence & Data Science — 2022 – 2026

Prof. Ram Meghe Institute of Technology & Research (PRMITR) — *Amravati, Maharashtra*
